PROFESSIONAL SUMMARY

3rd-year M.Sc. IT student who shipped 3 live full-stack applications — including a face-recognition school management platform serving 500–1,000 records, deployed on Vercel (frontend) and Render (backend). StudentFlow, my flagship MERN project, features five user roles, AI chat, and PDF generation. I have completed two Deloitte Forage simulations in Data Analytics and Cybersecurity, and hold a 9.82 CGPA in Sem 3 — consistently improving every semester. I learn by building — every project I write is production-intentional.

PROJECTS

StudentFlow — School Management Platform

2025–2026

React 19 · TypeScript · Node.js + Express 5 · MongoDB · Mongoose · JWT · TanStack Query v5 · Zustand · Recharts · PDFKit · face-api.js

🌐 <https://github.com/Khushi288-creator/studentflow> ▶Live: studentflow-mongodb-f7j2a4bw-khushis-projects-dcd656d5.vercel.app

- ▶ Architected a 5-role platform (Admin, Teacher, Student, Parent, Exam Dept) with JWT-secured dashboards, 25+ MongoDB models, and 20+ REST API endpoints — handles 500–1,000 student records
- ▶ Built AI-powered face recognition attendance using face-api.js — auto-marks attendance via live camera by matching registered student faces in real-time
- ▶ Integrated AI chat via Groq API, PDF report generation with PDFKit, and file uploads via Multer — all production-intentional, zero shortcuts

Portfolio Website

2026

React · Tailwind CSS · Vite · Vercel

🌐 <https://github.com/Khushi288-creator/Portfolio> ▶Live: khushi-devfolio.vercel.app

- ▶ Personal developer portfolio showcasing all projects with live demos — fully responsive, deployed on Vercel

AI Jailbreak Arena — College Event Game

2026

JavaScript · HTML · CSS · AI Prompting · Git

🌐 <https://github.com/Khushi288-creator/ai-jailbreak-arena> ▶Live: ai-jailbreak-arena.onrender.com

- ▶ Built an interactive browser game for a college event where all participants played — fully responsive, works on mobile and desktop
- ▶ Deployed live on Render — accessible via link without any local setup. Group project with real users playing during the event

JavaScript · Chrome Extensions API · Manifest v3 · HTML · CSS · Git · python · Groq API

📄 <https://github.com/Kunjprajapati70/web-extension-hackathone>

- ▶ Collaborated in a 4-member team to build a Chrome extension that extracts video captions/transcripts and generates interactive quizzes for active learning
- ▶ Contributed to UI design, content script, testing, documentation, and project integration during Crafhtho Hackathon, Gandhinagar University

Volunteer Management System

2026

React.js · Node.js · Express.js · MongoDB Atlas · JWT · Tailwind CSS · Axios · Vercel · Render

📄 <https://github.com/Khushi288-creator/Volunteer-Management-System> ▶Live: volunteer-management-system-bt8b.vercel.app

- ▶ Developed a full-stack MERN application with secure JWT authentication for volunteers and administrators — role-based access control with protected routes
- ▶ Built features including Volunteer Registration, Login, Profile Management, Admin Dashboard, Volunteer Search, Delete Volunteer, and Live Statistics backed by MongoDB Atlas
- ▶ Implemented REST APIs, responsive UI with Tailwind CSS, and deployed frontend on Vercel and backend on Render — complete end-to-end deployment
